## Fund Profile

Mint Tower Capital, established in 2010, is an Amsterdam based investment adviser to the Mint Tower Arbitrage Fund and specialized in volatility arbitrage with a long volatility bias. Via a quantitative approach and a qualitative overlay the fund invests almost exclusively via liquid exchange cleared instruments in volatility strategies that span equities, credit and convertible bonds globally. The applied combined strategies provide consistent, uncorrelated risk-adjusted returns throughout the economic cycle while decreasing the overall risk profile of a broader institutional portfolio.
